

## **WETLANDS NOTICE FOR FUTURE TAX CREDIT APPLICATIONS**

It has come to the attention of MHC that several developments that have received tax credits, from previous allocation cycles, have not been able to begin construction due to wetlands issues. It is recommended that developments to be located in areas of the State, particularly the lower six counties, that might encounter wetlands issues begin research of the intended development site so that timely development of the site might be shown at the time of the application submission to MHC.
